Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent to Seeberger et al. in view of Yamashita. Seeberger discloses a door module (1, 3, 8, and 9) and method of assembling comprising of a pair of guide rails having a cable drive system (1), a door module mounting panel (3), an electrical wire harness attached thereto (8), and an electrical drive motor having control electronics (9). Seeberger fails to disclose the electrical drive motor and control electronics to be mounted within a housing. Yamashita discloses a door module having a cavity and cover which contains the electrical drive motor and control electronics. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Seeberger with a housing to contain the electric drive motor and control electronics as taught by Yamashita since a contained housing protects the motor drive and electronics from moisture thereby preventing rust or a short in the electronics.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patents to Carlo et al., Okamoto et al., Hashimoto et al., Blakewood et al., Skrbina et al., Pfeiffer et al., Barrero Serrano et al., Curtindale et al., and Ueda et al. disclose elements similar to that of the applicants invention.
